We are delighted to invite you to participate in the 2019 ISOCS/IEEE International Symposium on Olfaction and Electronic Nose (ISOEN).

ISOEN 2019 will be held at ACROS Fukuoka close to Fukuoka airport. Fukuoka is an energetic city and the center of core city of politics, economy, culture and fashion in Kyushu located in western Japan.

ISOEN 2019 provides a forum for scientists, engineers and practitioners to share their latest findings, innovations and products in the area of artificial chemoreception (olfaction and taste). Now in its eighteenth edition, ISOEN 2019 will place special emphasis on technologies for IoT, AI, deep learning, robotics with mobile, wearable, and distributed chemical sensors. ISOEN attracts contributions from fields as diverse as:

- Odor sampling: headspace analysis, dynamic sampling, pre-concentration and storage
- Chemical sensors: gas, biosensors, ion-selective, optical
- Sensor systems: electronic noses, electronic tongues, micro-spectrometers, IoT
- Data analysis: signal processing, pattern recognition, chemometrics, AI, deep learning
- Industrial applications: quality control, food safety, medical diagnostics, environmental monitoring
- Robotic systems: robots with chemical senses, drone
- Scent presentation: olfactometry, olfactory displays, human interface, virtual reality
- Odor/gustatory perception: evaluation of odor intensity/impression, cross-modal effect, sensory test,
- ECG/EEG/NIRS measurement
- Bio-engineering: cell-based olfactory sensors, receptor-based sensors, bio-inspired algorithms

As the world's premiere technical conference in artificial chemoreception, ISOEN 2019 will bring approximately 250 participants from academic, research and corporate organizations. The exhibition will be closely integrated with the technical program through tutorials, plenary sessions, industrial panels, sensor and sensor systems demonstrations, industrial innovation sessions, and social activities for delegates and exhibitors alike.
